

LIGHTS THE PATHS TO SUSTAINABLE SUCCESS

www.mnysolar.com

ABOUT US

We're a service-oriented company, offering exceptional solutions and features. We offer a complete range of customized solutions for solar power projects. solar engineering, procurement and construction ("EPC") M & Y SOLAR services, catering to the increasing demand for renewable energy in the country. Our skilled and dedicated EPC team ensures the completion of each solar plant from concept to commissioning of the plant.

The company, expertise in engineering and technology, procurement and project management, Our operational footprint spans across the picturesque landscapes of Uttarakhand and Uttar Pradesh, with a special focus on District Haridwar and Dehradun. As a homegrown company, we are committed to making a significant impact on the energy landscape of the region.

OUR MISSION

M&Y Solar is dedicated to reshaping the energy landscape by empowering clients with cutting-edge and sustainable solutions. Our mission is centered on delivering client-centric, innovative, and environmentally conscious solar technologies that surpass expectations. From tailored efficiency to environmental stewardship, we strive to be more than just a solar provider, aiming to architect a transformative future where clean energy is accessible, efficient, and environmentally responsible.

M&Y Solar - Shaping Tomorrow's Sustainable Energy Today.

OUR VISION

M&Y Solar is dedicated to advancing a sustainable future by providing innovative and reliable green energy solutions. Our mission is to be a leader in the development and deployment of environmentally friendly, energy-efficient, and cost-effective solar technologies.

We aim to empower communities with clean energy alternatives while delivering swift returns on investments, contributing to a greener and economically sound world.

WHY SOLAR

Cut Your Energy Bills by Up to 90%:

Save big with solar by drastically reducing your electricity costs, turning sunlight into savings.

25+ Years of Reliable Power:

Our solar panels are built to last, providing you with decades of clean, sustainable energy.

Boost Your Property Value:

Solar adds significant value to your home, making it more attractive to future buyers.

Energy Independence:

Generate your own power and reduce reliance on the grid. Control your energy costs and future-proof your home.

Environmentally Friendly:

Go green with solar and reduce your carbon footprint—contribute to a healthier planet for future generations.

Lock in Low Energy Rates:

Protect yourself from rising electricity prices by locking in lower, predictable energy costs.

Low Maintenance, High Efficiency:

Our panels require minimal maintenance, offering hassle-free energy generation year after year.

Government Incentives:

Take advantage of tax credits, rebates, and incentives that make switching to solar more affordable.

Weather-Resistant Durability:

Our solar panels are designed to withstand the toughest weather conditions, ensuring long-lasting performance.

OUR SERVICES

Energy Storage Evolution

Embracing advanced technology, M&Y Solar offers energy storage solutions in the form of Li-ion batteries, a superior alternative to traditional lead-acid batteries.

Solar Rooftop Excellence

Our Rooftop Solar solutions encompass an end-to-end turnkey project execution model under a fixed price fixed time structure.

Integrated EPC Solutions

As a comprehensive EPC solutions provider, M&Y Solar specializes in delivering end-to-end solutions for residential, commercial, industrial, and utility-scale projects.

Open Access Excellence

Leveraging the provisions of the Electricity Act, 2013, M&Y Solar offers open access solutions. Power consumers with a connected load of over 1 MW can now procure electricity from alternative sources.

OUR TEAM HAS SUCCESSFULLY COMPLETED

700+

Residential Projects

125+

Commercial Projects

Solarized rural India through helping small SMES (Flour mill, Saw machines) to run on **100% solar energy**

Mega Projects, Mega Impact

From rooftop installations to expansive solar farms, MNY Solar delivers projects ranging from 1 MW to 100 MW, powering thousands of homes and businesses across the country.

Cutting-Edge Technology

Utilizing high-efficiency panels, smart tracking systems, and energy storage solutions, we ensure maximum output and optimized energy distribution for every project.

Sustainability at the Core

With every project, we reduce carbon footprints and champion sustainability. Our solar installations collectively offset thousands of tons of CO₂ annually, aligning with global green energy goals.

Versatile Solar Solutions

Our expertise spans residential, commercial, and industrial sectors. Whether it's rooftop solar, utility-scale plants, or solar-powered water systems, we bring tailored solutions to meet diverse energy needs.

Partnerships That Matter

Trusted by governments, corporations, and non-profits, MNY Solar secures strategic partnerships and funding to drive large-scale renewable energy initiatives, pushing the envelope for a greener tomorrow.
